Do all of your personnel follow the required standards for repair and preventive maintenance? Do they fully understand and follow required procedures? Do they realize the possible implications of not following required procedures?

This course is specifically designed as an awareness course for all personnel. It has been developed as another opportunity to prevent serious injury or possible death do to carelessness.

- Lockout – The placement of a device that blocks the flow of energy from a power source to a piece of equipment.
- Tagout – The process of attaching a tag to a disconnect switch or other energy isolating device to warn others not to restore energy to the tagged equipment.
- Inspect and evaluate work sites and facilities to determine the necessity for development and implementation of a program to meet your needs.

Course Length Approximately 2.0 Hours
